Profile

Full-stack developer with a bachelor's degree in Computer Science from Universidade Católica de Brasília, experience in client-side and server-side development, frameworks and databases. Active, always looking for the best way to handle and premeditate in various situations. I participate easily in teamwork helping to solve problems, communicative, agile and helpful.

Professional experiences

WEB/CODIM | CENTRAL BANK OF BRAZIL | 2021 - 2022

· Member of the web development team;
· Maintenance, content updates and code corrections on the site pages and on the SharePoint corporate intranet of the Central Bank of Brazil;
· Migration with the IT Department of old structures to the new format;
· Publishing of documents and other files on the pages;
· Other activities related to the course.

DEVELOPMENT OF THE SYSTEM OF REGISTRATION AND MANAGEMENT OF EXTENSION PROJECTS OF THE CATHOLIC UNIVERSITY OF BRASÍLIA | JAN 2022 – DEC 2022

· Acting and coordinating on the front-end developed with React (using the Matrial-UI component library). I was also present in the back-end development. Project developed with the help of agile methods (Scrum with board in GitHub projects and Challenge Based Learning), the responsive web application (MVP) was developed in order to improve and automate the entire existing structure, which involves teachers, students and foreigners in the process of administration, registration and participation in the university extension projects**. This project was presented and defended to the board of the Universidade Católica de Brasília as the undergraduate thesis, obtaining maximum grade.**

Other experiences

. **Node, Java and Python together with the React and Vue.js front-end libraries:** To develop REASTful applications. Repositories available on Github.

. **Java, C and PHP in the development of several personal projects:** I have developed personal projects using several libraries and tools related to the languages, for example build automation tool (Maven), microservices with SpringBoot and Flask and other dependencies. Repositories available on my GitHub.

. **InovaAsbac Challenge Hackathon:** Fenasbac Institute (Sept. 06, 07 and 08, 2019 totaling 48 hours).
